Word Spreads About Aranar's Broken Glass Stabilizer™; School Districts and Property Managers Placing Orders for Unique Broken Solution

The best publicity of all is great word of mouth. And that's just what Aranar Glass Tech, LLC is getting as news spreads of the availability of its Stabilizer™, a revolutionary new broken glass solution for facilities managers, professionals and do-it-yourselfers.

Centennial School District in Portland, Oregon has ordered BGS™ for use in all schools within its system. The School District of Palm Beach C already using BGS™ in its 185 schools.

According to Jeffrey H. Diamond, President of Aranar Glass Tech, LLC, "We've also received orders from a local Florida property management as a construction company in Key West. With hurricane season approaching and otherwise uncertain climatic conditions, these groups as well districts are wasting no time in protecting students, businesses and property owners from potentially dangerous broken glass incidents. We are our Broken Glass Stabilizer™ is beginning to play a major role in protecting the public."

Diamond also noted that officials of MSC Industrial Direct (www.mscdirect.com), which is now distributing the BGS™ product, have enthusiastically embraced the product. "The MSC sales team was in to see us and told us that our Broken Glass Stabilizer™ is, in their words, 'The most exciting product we have for hurricane preparation!' The MSC sales force said they couldn't wait to get this product into the hands of their customers."

Diamond added that one of MSC's customers, the Key West Police Department, is waiting for BGS™ for use in Crime Scene Investigations (C

How BGS™ works: Using a proprietary, patent-pending technology, users can secure a broken glass window almost immediately with a spray-foam, thus "spraying on" safety and structural integrity, and eliminating broken glass hazards at the press of a button. Users can secure broken instantly, fuse hazardous shards into a safe panel, patch window holes with a weather-tight seal; and trap glass shards into a solid manageable

Aranar Glass Tech's BGS™ Spray Applied Foam empowers its users to:

- Secure broken glass in seconds
- Reduce the risk of injury
- Virtually eliminate time-consuming glass cleanup
- Save time and money
- Provide a better option to costly and cumbersome plywood fabrication.

Advises Diamond, "Each year roughly 300 million square feet of architectural glass is broken by accidents and natural disasters such as hurricane objects, earthquakes and hail. If you're a school district official, property manager, or facilities manager concerned about being prepared for the possibilities of glass breakage, or even a homeowner seeking a valuable tool to protect the home, you must take a serious look at this product
